# Architectural Aluminium Products

## Face-Lift

Face-Lift projects are done to existing bldg to improve their aesthetic looks and increase life of the bldg.

## Sliding Window

We have developed our own range of sliding window, consisting of 35 mm, 45 mm and 60 mm series for single as well as double glazed units.

## Structural Glazing

Designed with consideration for wind load and total load, structural glazing has added architectural beauty to the building. Structural Glazing provides excellent thermal insulation and sound reduction.

## Aluminium Composite Panels (ACP)

Aluminium Composite Panels are the ideal cladding for interior and exterior surfaces. The material is rigid, light and durable and can be easily transformed into curved and multi planar surfaces. Composite Panels are available in various colours.

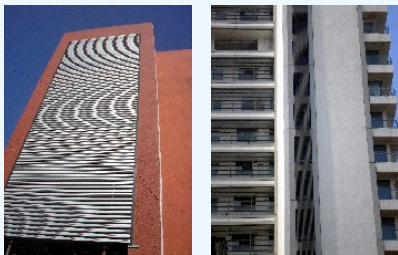

## Frameless Glass Handrail:

Designed using spigots to give a clear view without vertical or horizontal supports. Balustrades can be provided if reqd.

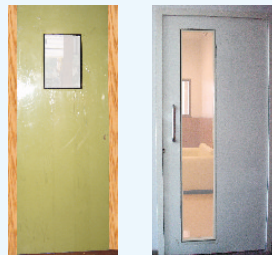

## Suspended Glazing

This system is ideal for storefronts, showrooms and mall. System consists of 12 mm or 15 mm clear glass and 19 mm glass fins supported with spiders or tension rods.

## Aluminium Fins:

Ideal for shaft / duct locations. Can be installed horizontally / vertically. Available in various design.

## Pharmaceutical Flush Door and Flush Partition

Flush doors with vision panel are widely used in pharma industry. Other pharma applications include double glazed flush vision panel and flush partition.

We specialize in Glass Fin Structure | Spider Glazing | Canopies | False Ceiling

ARCHITECTURAL ALUMINIUM PRODUCTS

*Total Façade Solution*

## Architectural Aluminium

A unique combination of properties makes aluminium one of the most important engineering and construction materials. It is light in weight, non-toxic, corrosion resistant and has high reflectivity to heat. The comparison cost of architectural aluminium products is much less than that of similar teak wood products.

## A range of aluminium profiles

All ALU-FINNS products are fabricated from high quality extrusion sections designed by us.

## Anodizing Aluminium Profiles

Anodizing of aluminium profiles makes the product more beautiful. The choice can be from natural matt to satin silver, black, golden or brown colour.

## Powder Coating Aluminium Profiles

Aluminium profiles can be powder coated to add beauty. The choice can be made from a variety of colours.

## High grade hardware

The fixing screws, handles, lock, glazing clip, etc; are of best available quality that matches aluminium profiles.

## Supplied with superior glass

Aluminium profiles are glazed with clear, frosted, tinted or wired glass depending on the size and exposure to the wind. The glass is fastened on aluminium profiles with high quality gasket making it weatherproof.

## Expert installation

ALU-FINNS products are installed by highly trained installers and supervised by our experienced personnel. At ALU-FINNS, we are committed to providing you excellent service.
